50th Anniversary Chair in

Computational Models & Software Engineering

Faculty of Engineering and Informatics

University of Bradford, Bradford BD7 1DP, UK

Email: m.gheorghe@bradford.ac.uk

Dear Prof. Gheorghe,

Thank you for inviting me as member of the advisory board for the project Mem-ECOTEM: Unifying Approach in Membrane Computing; Expressivity, Complexity, Testing, Verification and Modelling.

This is a very interesting and timely project intersecting several of my key research areas, such as fundamental aspects of membrane computing, including computational power and complexity, various types of membrane systems and automata systems, networks of evolutionary processors. Also, it is of great interest to me the research programme proposed by the project for young researchers and PhD students, in my role of head of the Doctoral School of Informatics, Eötvös Loránd University, Budapest, Hungary.

I am very much keen to participate on this research proposal, as an advisory board member.

Sincerely yours,

Prof. Erzsébet Csuhaj-Varjú
